

Introduction (continued)

New road signs will soon be put in place to the south of Leighton Buzzard to reinforce Grovebury Road as the principle route into town.

Detailed design work will also start on the designs you see here to further reduce traffic using Billington Road and improve the route for pedestrians, cyclists and residents from Sandhills right up to Lake Street where it enters the town centre.

These works will use similar ideas to those used on Leighton Road and West Street, and will include some traffic calming, traffic signal removal, new zebra crossings, carriageway narrowing's and protected parking, additional trees, shrubs and grassed areas.
